

1VetTech Security Readiness Assessment

This brief assessment is designed to help individuals and organizations evaluate foundational cybersecurity practices. Review each question carefully and answer honestly based on your current environment.

Security Fundamentals Review

- Do you regularly update your router, smart devices, and computers with the latest security patches?
- Are strong, unique passwords used for every account across your systems?
- Is multi-factor authentication (MFA) enabled on critical or sensitive accounts?
- Are you confident in identifying phishing emails, scam messages, and social engineering attempts?
- Do you monitor login activity or receive alerts for unusual or unauthorized access attempts?
- Is your home or business Wi-Fi network securely configured with proper encryption and access controls?

Assessment Guidance

If you answered “No” to any of the questions above, your digital environment may have security gaps that require attention.

Contact 1VetTech to schedule a structured security review. We provide practical guidance, risk-focused recommendations, and foundational defensive strategies to help strengthen your protection posture.
